## EXPERIENCE

### Bondfire, Product & Front-end Developer

*April 2019 - Present*

Worked on wireframes, branding, prototyping and front-end development in React Native. Launched in June 2019.

### bitfwd, Front-end Developer

*September 2017 - April 2019*

Built Ethereum faucet with over 10,000 transactions. Co-wrote a viral tutorial on "How to issue your own ERC20 Token" with over 180,000 views. Lead over 20 workshops on Blockchain fundamentals.

### V-Kaiwa, Co-founder

*December 2016 - July 2017*

Conducted over 200 VR user sessions for UI/UX feedback and improvement. Built the MVP Prototype with C# and Unity

## PROJECTS

### Burn ETH Burn (1st Place)

Devpost: [http://bit.ly/burn\\_eth](http://bit.ly/burn_eth)

Built generative blockchain art which creates a pixel on a HTML Canvas for every transaction sent to the ETH address. Scraped with BeautifulSoup (Python).

### Accenture Blockchain Hackathon

April 2019

Github: [http://bit.ly/accenture\\_hack](http://bit.ly/accenture_hack)

Developed wireframes, design and implemented front-end using React and Bootstrap.

## EDUCATION

### University of New South Wales

2014 - 2019

Marketing & Finance
